

GIS Services

Southern Mapping provides a wide range of information, derived from a variety of sources including our own airborne sensors, satellite sensors, historical records as well as several shelf data sets. We use GIS technology to fuse this information into geospatial repositories. We are able to supply this for our client's in-house GIS use or we are able to offer an outsourced GIS services, where we provide the data hosting and manipulation. In addition, we offer GIS software and training, customized for your particular needs and using your own datasets. Our team of post graduate geospatial technologists also enable us to offer vector mapping from our imagery sources.

About Southern Mapping

Southern Mapping is based in Johannesburg, South Africa. Southern Mapping offers extensive high-accuracy lidar, imagery and remote sensing experience, as well as airborne topographic, hyperspectral, and thermal survey and mapping. We provide mapping services for engineering, infrastructure, mining, mapping, agriculture and environmental sectors in more than 45 African countries. Together with our parent company Woolpert, Inc., our talent includes a deep bench of worldwide, industry-leading experts that acquire, process and evaluate aerial, terrestrial, and bathymetric lidar and survey data. Through that alignment we employ our own fleet of manned and unmanned aircraft and cutting-edge sensors for both public and private applications. Southern Mapping is proud to be part of this powerful geospatial team, applying a wealth of unparalleled services across the globe.
